

The image features a close-up of a plush velvet sofa with a dark brown, horizontally ribbed backrest. Two pillows are positioned on the sofa: a plain, light beige rectangular pillow on the left and a larger, dark brown quilted pillow with a diamond pattern on the right. The text "VELVET" is printed in a large, white, serif font across the middle of the quilted pillow, with "COLLECTION 2019" in a smaller, white, serif font directly below it. The overall lighting is warm and soft, highlighting the texture of the velvet.

Fusto in legno massello e legno multistrato con cinghie elastiche intrecciate. Imbottitura in poliuretano espanso rivestito in vellutino bianco. Cuscini di schienale in Piumafib, una speciale miscela ipoallergenica di vera piuma e fibra poliestere siliconata\*. Cuscini di seduta costituiti da un inserto in poliuretano con densità di 30 Kg/m³ ricoperto da un trapuntino di vera piuma imbottito a scomparti\*. Completamente sfoderabile in tessuto, non sfoderabile in pelle e finta pelle. Kit letto non disponibile.

\*Manutenzione dei cuscini contenenti piuma: I cuscini contenenti piuma tendono a deformarsi con l'utilizzo. Per mantenerne la forma è necessario, anche dopo un breve utilizzo, battere e sprimacciare ripetutamente i cuscini. Non utilizzare mai battipanni o aspirapolvere. A coloro che non desiderassero seguire queste indicazioni o che volessero un divano dall'aspetto meno vissuto, raccomandiamo di preferire dei cuscini in gomma.

*Carcasse en bois massif et multiplis muni de bandes élastiques entrecroisées et finie de mousse polyuréthane couverte de dacron. Coussins de dossier en Piumafib, un mélange hypoallergénique spécial de véritable duvet et fibre polyester siliconisée\*. Les coussins d'assise sont composés d'un noyau en mousse polyuréthane d'une densité de 30 kg/m³ couvert de véritable duvet broché en compartiments\*. Revêtement complètement déhoussable en tissu, fixe en cuir et cuir look. Pas disponible en canapé-lit. \*Entretien de coussins en duvet: Coussins en duvet ont tendance à perdre leur forme dû à l'usage. Pour en conserver la forme il est nécessaire, aussi après un usage court, de régulièrement battre les coussins. Ne jamais utiliser la tapette ou l'aspirateur. À ceux qui ne désirent pas suivre ces indications ou qui souhaitent un canapé qui ait l'air moins "usé", nous conseillons vivement de choisir des coussins en mousse polyuréthane.*

*Frame made of solid wood and multi-ply wood with interwoven elastic straps. The upholstery is made of polyurethane foam, covered with dacron. The back cushions are filled with Piumafib, a special hypoallergenic mixture of feathers and siliconised polyfibre\*. The seat cushions are made of a foam insert with density of 30 Kg/m³, covered with a feather compartments quilt\*. Fully removable fabric covers, fixed leather and artificial leather covers. Sofa-bed is not available. \*Maintenance of feather cushions: Cushions filled with feathers tend to change their shape with use. In order to keep their shape it is necessary, even after a short use, to plump up the cushions repeatedly. Never use carpet beater or vacuum cleaner. We recommend to choose foam cushions to those who do not wish to follow these instructions or to have a "used look" sofa.*

Для производства каркаса используется массив дерева и многослойная фанера в сочетании с перекрещивающимися эластичными ремнями. Наполнение из полиуретана, обернутого в белый бархат. Наполнение подушек спинки выполнено из материала Piumafib – специальной, не вызывающей аллергии смеси из натурального пуха и полиэфирных силиконовых волокон\*. Подушки сиденья: стеганные по отсекам, наполнение из натурального пуха с вставками из полиуретана плотностью 30 кг/м³ \*. Полностью съемные чехлы из ткани, несъемные чехлы из кожи.

*Das Gestell besteht aus Massiv- und Schichtholz, mit geflochtenen Gummigurten, gepolstert mit Polyurethanschäumstoff, mit Dacron bezogen. Rueckenkissen aus Piumafib, einer hypoallergenischen speziellen Mischung aus echter Daune und silikonisierter Polyesterfaser\*. Die Sitzkissen bestehen aus einem Schaumkern mit Dichte 30 Kg/m³ mit einer gekammerten Daunenauflage\*. Stoffbezeuge alle abziehbar, Leder und Kunstleder festbezogen. Als Bettsofa nicht verfügbar. Wartungsanleitungen fuer Daunenkissen: Die Kissen, die Daunen enthalten, neigen dazu, sich durch Gebrauch zu verformen. Um die urspruengliche Form zu halten, ist es notwendig, auch nach kurzem Gebrauch, die Kissen wiederholt aufzuschuettern. Keinen Ausklopfper oder Staubsauger verwenden. Unseren Kunden, die diese Anweisungen nicht befolgen moechten, oder die kein Sofa mit solchem "gebrauchten" Aussehen haben moechten, empfehlen wir Polyurethan-Kissen.*

Вариант со спальным местом не предусмотрен. \*Эксплуатация подушек с пуховым наполнением: В процессе эксплуатации подушки с пуховым наполнением могут деформироваться, во избежание чего их необходимо слегка взбивать вручную даже после непродолжительного нахождения на диване. Использование в этих целях пылесоса или выбивалки для одежды категорически запрещено. Если клиент не планирует следовать данным инструкциям и хочет, чтобы подушки сиденья и спинки проминались по минимуму, посоветуйте выбрать наполнение только из полиуретана, полностью исключив натуральный пух.

Per mantenerne la forma è necessario, anche dopo un breve utilizzo, battere e sprimacciare ripetutamente i cuscini. Non utilizzare mai battipanni o aspirapolvere. A coloro che non desiderassero seguire queste indicazioni o che volessero un divano dall'aspetto meno vissuto, raccomandiamo di preferire dei cuscini in gomma.

Fusto in legno massello e legno multistrato con cinghie elastiche intrecciate. Imbottitura in poliuretano espanso rivestito in vellutino bianco. Cuscini di schienale in Piumafib, una speciale miscela ipoallergenica di vera piuma e fibra poliestere siliconata\*. Cuscini di seduta costituiti da un inserto in poliuretano con densità di 30 Kg/m³ ricoperto da un trapuntino di vera piuma imbottito a scomparti\*. Completamente sfoderabile in tessuto, non sfoderabile in pelle e finta pelle. Kit letto non disponibile. \*Manutenzione dei cuscini contenenti piuma: I cuscini contenenti piuma tendono a deformarsi con l'utilizzo. Per mantenerne la forma è necessario, anche dopo un breve utilizzo, battere e sprimacciare ripetutamente i cuscini. Non utilizzare mai battipanni o aspirapolvere. A coloro che non desiderassero seguire queste indicazioni o che volessero un divano dall'aspetto meno vissuto, raccomandiamo di preferire dei cuscini in gomma.

*Carcasse en bois massif et multiplis muni de bandes élastiques entrecroisées et finie de mousse polyuréthane couverte de dacron. Coussins de dossier en Piumafib, un mélange hypoallergénique spécial de véritable duvet et fibre polyester siliconisée\*.*  
*Les coussins d'assise sont composés d'un noyau en mousse polyuréthane d'une densité de 30 kg/m³ couvert de véritable duvet matelassé en compartiments\*.*  
*Revêtement complètement déhoussable en tissu, fixe en cuir et cuir look. Pas disponible en canapé-lit.*  
*\*Entretien de coussins en duvet: Coussins en duvet ont tendance à perdre leur forme dû à l'usage. Pour en conserver la forme il est nécessaire, aussi après un usage court, de régulièrement battre les coussins. Ne jamais utiliser la tapette ou l'aspirateur. À ceux qui ne désirent pas suivre ces indications ou qui souhaitent un canapé qui ait l'air moins "usé", nous conseillons vivement de choisir des coussins en mousse polyuréthane.*

*Frame made of solid wood and multi-ply wood with interwoven elastic straps. The upholstery is made of polyurethane foam, covered with dacron. The back cushions are filled with Piumafib, a special hypoallergenic mixture of feathers and siliconised polyfibre\*. The seat cushions are made of a foam insert with density of 30 Kg/m³, covered with a feather compartments quilt\*. Fully removable fabric covers, fixed leather and artificial leather covers. Sofa-bed is not available.*  
*\*Maintenance of feather cushions: Cushions filled with feathers tend to change their shape with use. In order to keep their shape it is necessary, even after a short use, to plump up the cushions repeatedly. Never use carpet beater or vacuum cleaner. We recommend to choose foam cushions to those who do not wish to follow these instructions or to have a "used look" sofa.*

Для производства каркаса используется массив дерева и многослойная фанера в сочетании с перекрещивающимися эластичными ремнями. Наполнение из полиуретана, обернутого в белый бархат. Наполнение подушек спинки выполнено из материала Piumafib – специальной, не вызывающей аллергию смеси из натурального пуха и полиэфирных силиконовых волокон\*. Подушки сиденья: стеганые по отсекам, наполнение из натурального пуха с вставками из полиуретана плотностью 30 кг/м³ \*. Полностью съемные чехлы из ткани, несъемные чехлы из кожи. Исполнение дивана в версии со спальным местом: возможно

*Das Gestell besteht aus Massiv- und Schichtholz, mit geflochtenen Gummigurten, gepolstert mit Polyurethanschaumstoff, mit Dacron bezogen. Rueckenkissen aus Piumafib, einer hypoallergenischen speziellen Mischung aus echter Daune und silikonisierter Polyesterfaser\*. Die Sitzkissen bestehen aus einem Schaumkern mit Dichte 30 Kg/m³ mit einer gekammerten Daunenauflage\*. Stoffbezeuge alle abziehbar, Leder und Kunstleder festbezogen. Als Bettsofa nicht verfuegbar.*  
*\*Wartungsanleitungen fuer Daunenkissen: Die Kissen, die Daunen enthalten, neigen dazu, sich durch Gebrauch zu verformen. Um die urspruengliche Form zu halten, ist es notwendig, auch nach kurzem Gebrauch, die Kissen wiederholt aufzuschuettn. Keinen Ausklopfen oder Staubsauger verwenden. Unseren Kunden, die diese Anweisungen nicht befolgen moechten, oder die kein Sofa mit solchem "gebrauchten" Aussehen haben moechten, empfehlen wir Polyurethan-Kissen.*

*\*Эксплуатация подушек с пуховым наполнением: В процессе эксплуатации подушки с пуховым наполнением могут деформироваться, во избежание чего их необходимо слегка взбивать вручную даже после непродолжительного нахождения на диване. Использование в этих целях пылесоса или выбивалки для одежды категорически запрещено. Если клиент не планирует следовать данным инструкциям и хочет, чтобы подушки сиденья и спинки проминались по минимуму, посоветуйте выбрать наполнение только из полиуретана, полностью исключив натуральный пух.*

Disponibile con profondità di seduta 100/110 cm \*Manutenzione dei cuscini contenenti piuma: I cuscini contenenti piuma tendono a deformarsi con l'utilizzo. Per mantenerne la forma è necessario, anche dopo un breve utilizzo, battere e sprimacciare ripetutamente i cuscini. Non utilizzare mai battipanni o aspirapolvere. A coloro che non desiderassero seguire queste indicazioni o che volessero un divano dall'aspetto meno vissuto, raccomandiamo di preferire dei cuscini in gomma.

Carcasse en bois massif et multiplis muni de bandes élastiques entrecroisées et finie de mousse polyuréthane couverte de dacron. Coussins de dossier en Piumafib, un mélange hypoallergénique spécial de véritable duvet et fibre polyester siliconisée\*. Revêtement complètement déhoussable en tissu, fixe en cuir et cuir look. Pas disponible en canapé-lit. Profondeurs d'assise disponibles: cm 100/110 \*Entretien de coussins en duvet: Coussins en duvet ont tendance à perdre leur forme dû à l'usage. Pour en conserver la forme il est nécessaire, aussi après un usage court, de régulièrement battre les coussins. Ne jamais utiliser la tapette ou l'aspirateur. À ceux qui ne désirent pas suivre ces indications ou qui souhaitent un canapé qui ait l'air moins "usé", nous conseillons vivement de choisir des coussins en mousse polyuréthane.

Frame made of solid wood and multi-ply wood with interwoven elastic straps. The upholstery is made of polyurethane foam, covered with dacron. The back cushions are filled with Piumafib, a special hypoallergenic mixture of feathers and siliconised polyfibre\*. The seat cushions are made of a foam insert with density of 30 Kg/m³, covered with a feather compartments quilt\*. Fully removable fabric covers, fixed leather and artificial leather covers. Sofa-bed is not available. Available seat depths: 100/110 cm \*Maintenance of feather cushions: Cushions filled with feathers tend to change their shape with use. In order to keep their shape it is necessary, even after a short use, to plump up the cushions repeatedly. Never use carpet beater or vacuum cleaner. We recommend to choose foam cushions to those who do not wish to follow these instructions or to have a "used look" sofa.

Fusto in legno massello e legno multistrato con cinghie elastiche intrecciate. Imbottitura in poliuretano espanso rivestito in vellutino bianco. Cuscini di schienale in Piumafib, una speciale miscela ipoallergenica di vera piuma e fibra poliestere siliconata\*. Cuscini di seduta costituiti da un inserto in poliuretano con densità di 30 Kg/m³ ricoperto da un trapuntino di vera piuma imbottito a scomparti\*. Completamente sfoderabile in tessuto, non sfoderabile in pelle e finta pelle. Kit letto non disponibile. \*Manutenzione dei cuscini contenenti piuma: I cuscini contenenti piuma tendono a deformarsi con l'utilizzo. Per mantenerne la forma è necessario, anche dopo un breve utilizzo, battere e sprimacciare ripetutamente i cuscini. Non utilizzare mai battipanni o aspirapolvere. A coloro che non desiderassero seguire queste indicazioni o che volessero un divano dall'aspetto meno vissuto, raccomandiamo di preferire dei cuscini in gomma.

Frame made of solid wood and multi-ply wood with interwoven elastic straps. The upholstery is made of polyurethane foam, covered with dacron. The back cushions are filled with Piumafib, a special hypoallergenic mixture of feathers and siliconised polyfibre\*. The seat cushions are made of a foam insert with density of 30 Kg/m³, covered with a feather compartments quilt\*. Fully removable fabric covers, fixed leather and artificial leather covers. Sofa-bed is not available. \*Maintenance of feather cushions: Cushions filled with feathers tend to change their shape with use. In order to keep their shape it is necessary, even after a short use, to plump up the cushions repeatedly. Never use carpet beater or vacuum cleaner. We recommend to choose foam cushions to those who do not wish to follow these instructions or to have a "used look" sofa.

Das Gestell besteht aus Massiv- und Schichtholz, mit geflochtenen Gummigurten, gepolstert mit Polyurethanschaumstoff, mit Dacron bezogen. Rueckenkissen aus Piumafib, einer hypoallergenischen speziellen Mischung aus echter Daune und silikonisierter Polyesterfaser\*. Die Sitzkissen bestehen aus einem Schaumkern mit Dichte 30 Kg/m³ mit einer gekammerten Daunenauflage\*. Stoffbezüge alle abziehbar, Leder und Kunstleder festbezogen. Als Bettsofa nicht verfügbar. Wartungsanleitungen fuer Daunenkissen: Die Kissen, die Daunen enthalten, neigen dazu, sich durch Gebrauch zu verformen. Um die urspruengliche Form zu halten, ist es notwendig, auch nach kurzem Gebrauch, die Kissen wiederholt aufzuschuettern. Keinen Ausklopfen oder Staubsauger verwenden. Unseren Kunden, die diese Anweisungen nicht befolgen moechten, oder die kein Sofa mit solchem "gebrauchten" Aussehen haben moechten, empfehlen wir Polyurethan-Kissen.

Carcasse en bois massif et multiplis muni de bandes élastiques entrecroisées et finie de mousse polyuréthane couverte de dacron. Coussins de dossier en Piumafib, un mélange hypoallergénique spécial de véritable duvet et fibre polyester siliconisée\*. Les coussins d'assise sont composés d'un noyau en mousse polyuréthane d'une densité de 30 kg/m³ couvert de véritable duvet broché en compartiments\*. Revêtement complètement déhoussable en tissu, fixe en cuir et cuir look. Pas disponible en canapé-lit. \*Entretien de coussins en duvet: Coussins en duvet ont tendance à perdre leur forme dû à l'usage. Pour en conserver la forme il est nécessaire, aussi après un usage court, de régulièrement battre les coussins. Ne jamais utiliser la tapette ou l'aspirateur. À ceux qui ne désirent pas suivre ces indications ou qui souhaitent un canapé qui ait l'air moins "usé", nous conseillons vivement de choisir des coussins en mousse polyuréthane.

Для производства каркаса используется массив дерева и многослойная фанера в сочетании с перекрещивающимися эластичными ремнями. Наполнение из полиуретана, обернутого в белый бархат. Наполнение подушек спинки выполнено из материала Piumafib – специальной, не вызывающей аллергию смеси из натурального пуха и полиэфирных силиконовых волокон\*. Подушки сиденья: стеганные по отсекам, наполнение из натурального пуха с вставками из полиуретана плотностью 30 кг/м³ \*. Полностью съемные чехлы из ткани, несъемные чехлы из кожи.

Вариант со спальным местом не предусмотрен. \*Эксплуатация подушек с пуховым наполнением: В процессе эксплуатации подушки с пуховым наполнением могут деформироваться, во избежание чего их необходимо слегка взбивать вручную даже после непродолжительного нахождения на диване. Использование в этих целях пылесоса или выбивалки для одежды категорически запрещено. Если клиент не планирует следовать данным инструкциям и хочет, чтобы подушки сиденья и спинки проминались по минимуму, посоветуйте выбрать наполнение только из полиуретана, полностью исключив натуральный пух.

2009

La collezione STRIPES, creata dal designer Jérôme Gauthier, è ispirata alle tipiche panchine a doghe in legno orizzontali utilizzate nei parchi pubblici parigini ed è caratterizzata dalla trapuntatura a righe (da cui viene il nome "Stripes"). Stripes è un modello testato fonoassorbente ed è conforme ai test BIFMA statunitensi. Per favorire l'ergonomia e la comodità del prodotto, lo schienale è dotato di un poggiareni con un angolo di inclinazione di ca. 22° in modo tale che non sono necessari cuscinetti per garantire il comfort. Seduta, schienale e braccioli sono composti da un fusto in pannelli di multistrato da 20 e 40 mm di prima scelta. La resistenza del fusto è garantita da una costruzione ad incastri che offre elevate garanzie di tenuta. La seduta, priva di cinghie elastiche intrecciate, è in poliuretano espanso CM 40/P kg/m³ 5,9 kPa e rinforzi con SR75 Kg/m³ 15,5 kPa.

Cuscino di seduta costituito da un inserto in poliuretano espanso con densità di 40 kg/m³ ricoperto da un trapuntino di vera piuma imbottito a scomparti.\* Schienale e poggiareni sono in poliuretano espanso CM 40 kg/m³ 5,9 kPa. Il fusto e i braccioli sono rivestiti in poliuretano espanso, con una densità di 40 kg/m³ 5,9 kPa e 75 kg/m³ 15,5 kPa. Per garantire la durabilità del prodotto nel tempo nei punti maggiormente soggetti a deformazione vengono utilizzati degli aggregati di poliuretano espanso della densità complessiva di 200 kg/m³, sotto cui è montata una piastra di metallo da 40 x 5 mm. La parte esterna del fusto è inoltre rivestita in fibra termolegata di 250 gr. I braccioli sono fissati tramite bulloni e baionette. Il poliuretano espanso è sempre ignifugo CMHR (Combustion Modified High Resilient) e risponde alle norme British Standard (BS), Cal 117, Classe 11M, nonché, su richiesta, ad altri standard (per esempio le norme tedesche DIN o le norme francesi NF). Le caratteristiche righe ("stripes" in inglese), orizzontali o verticali, sono ottenute tramite una trapuntatura che accoppia non solo il rivestimento (tessuto, finta pelle o pelle) e il dacron, ma anche uno strato di gomma con uno spessore di 1 cm. Ogni riga è alta 8 cm. Il rivestimento del modello Stripes è sempre fisso, sia in tessuto che in pelle e finta pelle. \*Manutenzione dei cuscini contenenti piuma: I cuscini contenenti piuma tendono a deformarsi con l'utilizzo. Per mantenerne la forma è necessario, anche dopo un breve utilizzo, battere e sprimacciare ripetutamente i cuscini. Non utilizzare mai battipanni o aspirapolvere. A coloro che non desiderassero seguire queste indicazioni o che volessero un divano dall'aspetto meno vissuto, raccomandiamo di preferire dei cuscini in gomma.

*The STRIPES collection, created by the designer Jérôme Gauthier, was inspired by the typical wooden horizontal slat benches used in public parks in Paris and is characterized by the stripes quilting, that is where the name "Stripes" comes from. Stripes is a tested sound absorbing model and complies with the U.S. BIFMA standards. In order to enhance the ergonomics and the comfort of the product, the backrest is equipped with a low back support with an inclination angle of about 22 degrees, so that no further cushions are needed to ensure the sofa comfort. Seat, backrest and arms have a frame made of 20 and 40 mm multi-ply wooden panels of the highest quality. The frame resistance is guaranteed by a joint construction. The seat, which is not equipped with interwoven elastic belts, is made of polyurethane foam CM 40/P kg/m³ 5,9 kPa, with supports in foam SR75 Kg/m³ 15,5 kPa. The seat cushion is made of a foam insert with density of 40 Kg/m³, covered with a feather compartments quilt\*. Backrest and low back support are made of polyurethane foam CM 40 kg/m³ 5,9 kPa. Frame and arms are upholstered with polyurethane foam with a density of 40 kg/m³ 5,9 kPa and 75 kg/m³ 15,5 kPa. The presence of polyurethane aggregates with an overall density of 200 kg/m³, under which there is a 40 x 5 mm metal plate, ensure the product durability over time in the areas which are more subject to deformation. The external frame side is also lined with a 250 gr. thermo-bonded fibre. The arms are fixed by means of bolts and bajonet joints. The polyurethane foam is alsways CMHR fire-retardant (Combustion Modified High Resilient) according to the British Standard regulations (BS), CAL 117, Class 11M, or, on demand, according to other regulations (such as the German DIN or the NF French regulations). The typical stripes, which can be horizontal or vertical, are obtained through a quilting process which couples not only the cover material – fabric, artificial leather or leather, wich dacron, but also a 1 cm thick foam layer. Each stripe is 8 cm high. Fabric, artificial leather and leather covers are always fixed. \*Maintenance of feather cushions: Cushions filled with feathers tend to change their shape with use. In order to keep their shape it is necessary, even after a short use, to plump up the cushions repeatedly. Never use carpet beater or vacuum cleaner. We recommend to choose foam cushions to those who do not wish to follow these instructions or to have a "used look" sofa.*

*Die Kollektion STRIPES, gezeichnet vom Designer Jérôme Gauthier, lehnt sich an die typischen Fassdaubenbänken in den Pariser Parks und ist durch die Streifenabsteppung – daher der Name «Stripes», gekennzeichnet. Stripes ist ein schallabsorbierendes, getestetes Modell und besteht die US-BIFMA Tests. Die Ergonomie und der Sitzkomfort des Produkts werden durch die in der Rückenlehne eingearbeitete Nierenschütze gefördert. Diese hat eine Neigung von ca. 22°, so dass zusätzliche Kissen nicht benötigt werden, um die Bequemlichkeit und den Sitzkomfort dieses Produkts zu gewährleisten. Sitz, Rückenlehne und Seitenteile bestehen aus einem Gestell aus Schichtholzplatten mit einer Dicke von 20 und 40 mm von höchster Qualität. Die Haltbarkeit des Gestells wird durch eine Steckkonstruktion gewährleistet. Die Sitzfläche, ohne geflochtene Gummigurtung, besteht aus Polyurethan-Schaumstoff CM 40/P kg/m³ 5,9 kPa, mit Verstärkung in SR75 Kg/m³ 15,5 kPa. Rückenlehne und Nierenschütze sind mit Polyurethan-Schaumstoff CM 40 kg/m³ 5,9 kPa gepolstert. Das Gestell und Seitenteile sind mit Polyurethan-Schaumstoff mit einer Dicke von 40 kg/m³ 5,9 kPa und 75 kg/m³ 15,5 kPa gepolstert. Das Sitzkissen besteht aus einem Schaumkern mit Dichte 40 Kg/m³ mit einer gekammerten Daunenauflage\*. Die Verwendung von Polyurethan-Schaumstoff-Aggregaten mit einer Gesamtdichte von 200 Kg/m³ in den Punkten, die der Verformung mehr ausgesetzt sind, sichert die Dauerhaftigkeit des Produktes für lange Zeit. Darunter wird zusätzlich eine Metallplatte 40 x 5 mm befestigt. Die Aussenseiten des Gestells sind zusätzlich mit einer Ummantelung aus thermogebundenen Fasern mit Gewicht 250 Gr. ausgestattet. Die Seitenteile sind mittels Schrauben und Bajonettverschlüssen befestigt. Der Polyurethan-Schaumstoff ist immer schwerentflammbar CMHR (Combustion Modified High Resilient), gemäß British Standard (BS), Cal 117, Klasse 11M, oder, auf Anfrage, gemäß anderen Standards, wie beispielsweise den deutschen DIN-Normen oder den französischen NF-Normen. Die typischen Streifen – Stripes –, die horizontal oder vertikal ausgeführt werden können, erhält man nicht nur durch die Verbindung des Bezugsmaterials – Stoff, Leder oder Kunstleder – mit Dacron, sondern es wird hier auch Schaumstoff mit einer Dicke von 1 cm eingearbeitet. Jeder Streifen ist 8 cm hoch. Die Modelle der Serie Stripes sind immer festbezogen.*

*\*Wartungsanleitungen fuer Daunenkissen: Die Kissen, die Daunen enthalten, neigen dazu, sich durch Gebrauch zu verformen. Um die urspruengliche Form zu halten, ist es notwendig, auch nach kurzem Gebrauch, die Kissen wiederholt aufzuschuetteln. Keinen Ausklopfer oder Staubsauger verwenden. Unseren Kunden, die diese Anweisungen nicht befolgen moechten, oder die kein Sofa mit solchem "gebrauchten" Aussehen haben moechten, empfehlen wir Polyurethan-Kissen.*

*La collection STRIPES, créée par le designer Jérôme Gauthier, est inspirée par les banquettes à lattes de bois horizontales utilisées dans les parcs publics parisiens et est caractérisée par le matelassage à rayures (d'où le nom "Stripes"). Stripes est un modèle testé insonore et est conforme aux tests étasuniens BIFMA. Pour faciliter l'ergonomie et le confort du produit, le dossier est équipé d'un support lombaire avec un angle d'inclinaison d'environ 22° de telle sorte que des coussins lombaires ne sont pas nécessaires pour assurer le confort. L'assise, le dossier et les accoudoirs sont composés d'une carcasse en panneaux de multiplis de 20 et 40 mm de premier choix. La résistance de la carcasse est assurée par une construction avec des joints qui offre des garanties élevées de durée de vie. L'assise, qui n'a pas de sangles élastiques entrecroisées, est en mousse de polyuréthane CM 40/P kg/m³ 5,9 kPa et renforts avec SR75 kg/m³ 15,5 kPa. Le dossier et les accoudoirs sont en mousse de polyuréthane CM 40 kg/m³ 5,9 kPa. La carcasse et les accoudoirs sont revêtus de mousse de polyuréthane avec une densité de 40 kg/m³ 5,9 kPa et 75 kg/m³ 15,5 kPa. Le coussin d'assise est composé d'un noyau en mousse polyuréthane d'une densité de 40 kg/m³ couvert de véritable duvet matelassé en compartiments\*. Afin d'assurer la durabilité du produit dans le temps au niveau des points les plus sujets à la déformation, des agrégats de mousse de polyuréthane d'une densité globale de 200 kg/m³ sont utilisés, sous lesquels est montée une plaque métallique de 40 x 5 mm. En plus, l'extérieur de la carcasse est revêtu de dacron de 250 grammes. Les accoudoirs sont fixés à l'aide de boulons et baïonnettes. La mousse de polyuréthane est toujours ignifuge CMHR (Combustion Modified High Resilient) et répond aux normes British Standard (BS), Cal 117, Classe 11M, ainsi que, sur demande, à d'autres normes (par exemple les normes allemandes DIN ou les normes françaises NF). Les rayures ("stripes" en anglais) caractéristiques, horizontales ou verticales, sont obtenues grâce à un matelassage qui couple non seulement le revêtement (tissu, similicuir ou cuir) et le dacron, mais aussi une couche de mousse de polyuréthane avec une épaisseur d'1 cm. Chaque rayure est haute 8 cm. Le revêtement du modèle Stripes est toujours fixe, aussi bien en tissu qu'en similicuir qu'en cuir.*

*\*Entretien de coussins en duvet: Coussins en duvet ont tendance à perdre leur forme dû à l'usage. Pour en conserver la forme il est nécessaire, aussi après un usage court, de régulièrement battre les coussins. Ne jamais utiliser la tapette ou l'aspirateur. À ceux qui ne désirent pas suivre ces indications ou qui souhaitent un canapé qui ait l'air moins "usé", nous conseillons vivement de choisir des coussins en mousse polyuréthane.*
